OUR
TRACKING
SOFTWARE
IS UNMATCHED
IN THE INDUSTRY.

We'll help you get organized from cataloging assets to covering your legal hold issues!

We Stand Alone

One company can bring a singular software solution to the e-Discovery issues of Assets, Chain of Custody and Legal Hold: Tracker Products.

Our barcode tracking software package is designed to support your company every step of the way. Simplicity. That's the key. The Tracker Products world-class software system is intuitive, customizable and well – amazingly easy!

And you can rest easy. From anywhere in the world, Tracker Products users have real-time access and real-time answers through a browser-based system that offers peace of mind.
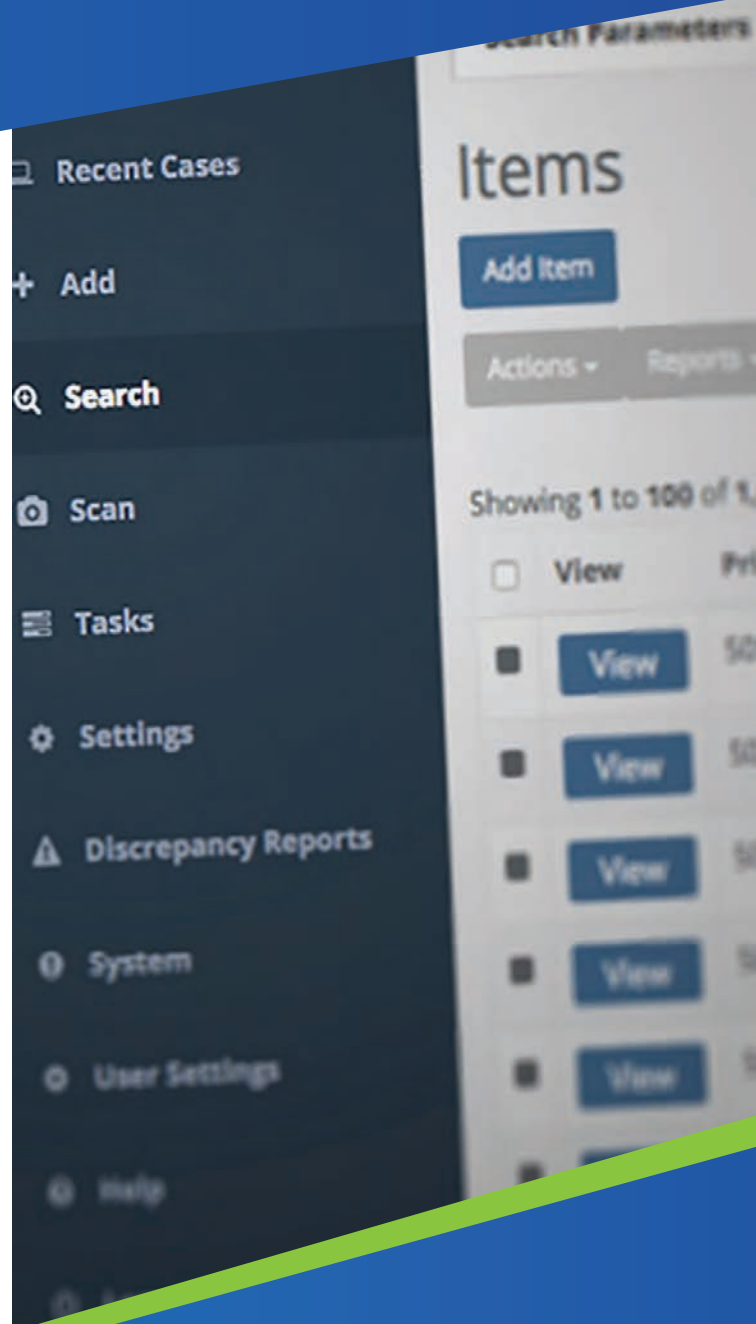

ASSETS

Your employees may have company computers, cell phones, tablets, removable storage devices and more. Do you know where those are? Who has access to them? What happens to them when the employee leaves? Do you know how many company laptops are due for replacement? What operating system are you running on each? Thousands of software systems track assets. We Do It Better!

LEGAL HOLD

You've likely been through the process before – receiving the notification of legal hold from human resources or the legal department. Our software brings a streamlined approach to separately preserving and tracking pertinent assets, virtually eliminating the liability of any possible sanctions.

CHAIN OF CUSTODY

Managing employee assets requires a system capable of producing an unbreakable chain of custody for many reasons. Tracker Products provides a rock-solid solution – from employee hiring to separation.
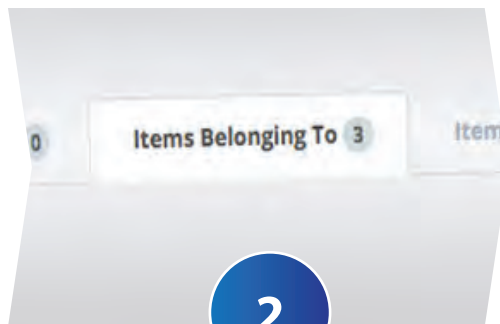

ASSET TRACKING
MADE EASY!

Whether you have a single location or offices across multiple geographical locations, our software is a one-stop collection point for tracking all of your assets. From computers to cell phones to hard drives and printers, Tracker Products has you covered.

One click shows you who has what. The next click? What those assets are. Search by employee ID number, first name, last name: When you get there, you'll have all the information you need!

On a wider scope, check out the assets across your entire company! Wondering how many computers you have? How about tablets or phones or printers? Know with one click!

DIGITAL ASSETS

We know that your company records often include photos, videos and other digital assets. No problem! Our solution manages physical and digital assets. While our software is browser-based, an on-premise file server keeps your digital records off the internet and securely protected. Add to that user permissions that you assign. With Tracker Products, your files remain secure, providing a rock-solid chain of custody.

ACTION IS CRITICAL!

**An API platform allows for seamless integration to any existing system.**

You receive that call – the one where your legal department or human resources officer notifies you of a legal hold on an employee. When assets become evidence, action is critical. How quickly can you track down all of the assets assigned to that employee? With Tracker Products, the answer is simple: Immediately! Forget the worries and possible liabilities that come with any legal hold.

With Tracker Products, assets assigned to individuals are easily identified and reports can be printed on the fly. Our wide range of customizable options provides you with a tailor-made system. And because our solution is browser based, the critical reports you need are always accessible from any computer, tablet or smart phone where internet access is available.

FEATURE-RICH SOFTWARE

- *Tracks both physical and digital evidence*
- *Streamlined dashboard*
- *Offers unparalleled customization*
- *Provides advanced stats and reporting*
- *Integrates your automated workflows*

ABOUT US

WHO WE ARE

Tracker Products has been an innovator in the asset/evidence management industry for over 20 years. We began as a small startup hardware and networking company in 1996, and the company quickly developed a strong reputation for development, problem solving and faithfully meeting client needs. That reputation led the Cincinnati suburb of Independence, KY, to reach out to Tracker as a consultant when they were looking for a software system to manage the department's collection, documentation and storage of evidence.

That was the launching pad. Today, Tracker Products remains focused on developing features that positively impact operational efficiency and effectiveness. Local, State and Federal agencies across the country rely on Tracker to help them manage their physical and digital assets, and the list grows longer every month. We look forward to meeting you!

WHO WE SERVE

Who uses Tracker Products software? Adobe Systems, the U.S. Army and Navy overseas, Law Firms, Hospitals, Museums, Universities. Their common ground? They all need to track the collection, processing and storage of critical assets and information.

SUCCESS BY THE THOUSANDS!

Our expertise reaches far and very, very wide. One client tracks the assets of more than 50 thousand employees. Keeping up with hard assets numbering just short of 300 thousand may seem impossible. Not so. The Tracker Products software solution keeps all of those records orderly, updated, and at the tip of their fingers.

It is our passion to deliver the best solution for you. Customizable. Easy to use. And of course, always focused on ways to save you TIME, MONEY and MANPOWER.

Need to get ahead? We got that…and more!
