2017 Release Notes (v.26) August 4, 2017

Software Enhancements

- Slider Fix - Show both options (Yes/No) on the slider. #2287
- Tag Cleanup - Some types of fields weren't working exactly as expected. On entering the first value, we weren't receiving a cursor in the field nor was it showing values as typing. #2506
- XXXXXXXX Date Importer / Updater. #2558
- Person Custom Fields - Disable on Entry - Now an option in Settings > organization to disable showing person custom fields on entry. #2594
- Item Belongs to field now allows use of a Business Name now that we have that as a Person Field. #2600
- Auto Dispo Email From update - An Auto Dispo "Email From" can now be from a User Group vs. an Individual. #2635
- IE11 EULA acceptance pop up not allowing Users to click "Accept" in IE11. #2643 v.blog
- User Groups that have been deactivated can now be re-activated. #2652
- Fix Tasks Page - Tasks list page was fixed since new Tasks with User as null was breaking the list of Tasks now. #2670

New Additions to:

- **Case Offense Types:** Driving Under Suspension, Drowning, Emergency Petition, Entering Auto, Indecent Exposure, Officer Involved Incident, Violation of Protective Order
- **Item Categories:** Condom, Fired Casing, Projectile, Sex Toys, Sporting Goods, Shoes, Storage Container
- **Disposal Methods:** External Hard Drive

Performance Improvements

- Scan of location & display - When doing a transaction that requires a scan of a location, a single scan will produce a Storage Location list. Now the single scan and enter saves the name. #2487
- Disable option worded incorrectly - In User Settings, it appeared the 'Block Email Notifications' was worded incorrectly. #2638
- Logout Error when User is not logged in, not due to Translation file. #2647
- Missing Tags in Item List - Tags checked from the Options drop down now display. #2663
- SLA Translation error in IE. scroll button wasn't translating properly. #2669
- Labels for Storage Locations - 2D barcode wasn't printing. This is now fixed. #2671
