## 2017 Release Notes (v.29) October 26, 2017

### Software Enhancements

- Custom Forms - Number Field Format - The dropdown has to have two options: "None" and "1000 Separator". If the field has "None" format, then the number is displayed as is (without thousands separator). #2461
- Send to Lab field - Removed from Drug Form (Sys Template) and created its own form. And all that goes with this (moving data, new widgets). #2505
- Update to Currency Custom Form - Removed "New Currency Total" from the Currency Form (Sys Template). #2595
- Import legacy tasks. #2655
- Created a Tooltip saying "You have not filled out this Item (or whatever) correctly" if Validation requirements have not been met. #2660
- Move Tables to a new DB. #2680
- Persons History now shows changes such as in Case and Items history. #2720
- Import legacy tasks (Export Script). #2742
- Import legacy tasks (Front-end). #2743
- Import legacy tasks (API). #2744
- Added support for selecting individual Persons to put on a Report. #2757
- Upon update we now force the browser to use the new version and reset cached files. #2763
- Reorganized Locations Script. #2770
- Importer - Media Import for 'isDeleted' items. #2772
- Persons now print before Items in Report Builder. #2773
- Added support for printing all Person default fields in Report Builder. #2774
- Removed personTypeId form xxxxx People Collection. #2775
- Error when opening a task - Opening a task was prohibited if the user opening the task did not create the task. We now allow a user to open a task that they did not create. #2776
- When editing a person, you can now add a form. This mimics the way Case edit functions. #2778
- Made Case # an active link. #2780
- Check boxes were still displayed as green. #2781
- Added size to statistics widget for media to allow the total size of files counts. #2782
- Checkbox in Media Stats Widget. #2784
- Copy Custom Fields script with UI. #2785
- Created a Default Person Address. This will be used when printing a person address #2788
- Widget fix - Made changes to the Widgets controller so the Widget stats work without doing a refresh. #2792
- Additional barcode scanning in DR was broken - Extra Barcodes weren't scannable in a Discrepancy Report. This was causing a discrepancy error. Discrepancy Report now supports imported barcodes #2793

- Updates to Discrepancy Report - 1. Default order the list by Created on Desc. 2. For each line on the main page, include the stats that we have in the database for each report. 3. Change the Red trash can icon to something not red and not a trash can. 4. Added a radio button or slider at the top of the page to toggle between Active and Hidden. #2794
- No longer showing Inactive Offices in Permissions Matrix. #2800
- TypeError: Cannot read property 'selectedOrganizationId' of null. #2804
- Save UTC offset in data import. #2812
- Extra barcode wasn't saving during a data import. #2813
- TypeError: Unable to get property 'id' of undefined or null reference. #2815
- Investigated the plan of xxxxx xx Driver upgrade. #2832
- Removed Inline Manual. #2856

#### **New Additions to:**

- **Item Categories:** Urine Kit
- **Checkout Reasons:** Taken for Disposal

#### **Performance Improvements**

- Blue line was displayed instead of Users drop down in the Users field on the Edit User Group page. #2747
- Settings \ Organization \ Person Formatting NOT governing Custodian Field correctly. Settings \ Org \ Person Formatting - ItemBelongsTo field name format is now controlled by the person formatting. #2755
- New Forms were not being created and Add Form page remained the same for both Case, Items and People. #2806
- Receiving an Error Message uploading a file which is > 10k items via Data Import. #2809
- Reports List - A list of Reports on a case-view page is loading every time when Items tab opening, without cleaning a previous list. The more tab switching - the more duplicated rows are in the list. #2819
- Item Categories list was broken. #2821
